

Patrick James Pangilinan

0966-749-7052 ; 0976-339-7093 | patrickjpangilinan@protonmail.com | github.com/pjpangilinan

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, Bash

Frameworks & Tools: Linux, React, FastAPI, Git, Docker, Postman

EXPERIENCE

Tech Support Intern

July 2025 – September 2025

City Government of Trece Martires – ICT Division

Trece Martires City

- Cleaned and verified large-scale digital citizen records from post-2004 archives, improving data accuracy and consistency.
- Supported rollout of a Document Tracking System across multiple departments by assisting in system validation, user onboarding, and issue resolution.
- Troubleshoot hardware, software, and network issues across office systems.
- Configured workstations and peripherals to support reliable day-to-day operations for staff.

Part Timer

2021 – Present

NLMontano Accounting Firm

Trece Martires City

- Processed and encoded government remittances, including SSS, PhilHealth, and Pag-IBIG.
- Provided technical support for PCs, printers, and small office networks, including setup, maintenance, and troubleshooting.
- Assisted in maintaining system reliability and resolving technical issues in a small business environment.

PROJECTS

VOTECHAIN: Voting Optimization Through Encrypted Blockchain

Python, Raspberry Pi, Blockchain, React, WebSockets

github.com/pjpangilinan/votechain

- Designed and developed a secure electronic voting system using Raspberry Pi and a Python-based blockchain architecture.
- Implemented SHA-256 cryptographic hashing and chained blocks to support tamper-evident, immutable vote records.
- Built a real-time transparency dashboard using React and WebSockets to display live vote counts for public auditing.
- Engineered end-to-end system architecture, including hardware input, local processing, secure storage, and web-based visualization.

Up To Date – AI-Powered News Dashboard

React, FastAPI, Groq API, Docker, PWA

github.com/pjpangilinan/tech-dashboard

- Developed a full-stack web application using React and FastAPI.
- Integrated AI-powered summarization through the Groq API for on-demand content insights.
- Implemented custom RSS feeds, keyboard shortcuts, and Progressive Web App installability.
- Containerized the application using Docker for consistent deployment and scalability.

EDUCATION

Cavite State University

Bachelor of Science in Computer Engineering

Bancod, Indang, Cavite

2022 – 2027

CERTIFICATIONS

Google Advanced Data Analytics Professional – Coursera

May 2025

coursera.org/share/ea689640b74331ba8237231893ad55be

ISO, CMMI & Project Quality Certification Mastery – Coursera

May 2026
