

Patrick James Pangilinan

Full Stack Developer

patrickjpangilinan@protonmail.com | github.com/pjpangilinan |
linkedin.com/in/patrick-james-pangilinan-490a41329

Summary

Full Stack Developer focused on building reliable, end-to-end systems across Python, Go, and JavaScript. Comfortable across the stack — from API design and data modeling to UI implementation and CI/CD. Currently deepening expertise in DevOps, systems analysis, and AI-powered products.

Experience

Tech Support Intern

City Government of Trece Martires – ICT Division

July 2025 -- September 2025

Trece Martires City

- Verified and normalized legacy citizen records (post-2004) to improve archive accuracy.
- Supported the rollout of a Document Tracking System through validation, onboarding, and issue resolution.
- Diagnosed hardware, software, and network incidents across office endpoints.
- Provisioned workstations and peripherals to keep daily operations reliable.

Part Timer

NLMontano Accounting Firm

2021 -- Present

Gregorio, Trece Martires City

- Processed SSS, PhilHealth, and Pag-IBIG remittances with audit-ready accuracy.
- Maintained office IT – PCs, printers, and small networks – across setup, support, and troubleshooting.
- Kept a small-business IT environment stable and responsive to operational needs.

Selected Projects

VOTECHAIN – Python, Raspberry Pi, Blockchain, React, WebSockets

Blockchain-based e-voting with multi-factor auth and a real-time public transparency dashboard.

Kanbalio – React, Vite, GitHub Pages, GitHub Actions, LaTeX

This portfolio – glassmorphic command center with JSON-driven content and automated resume publishing.

Up To Date – React, FastAPI, Groq API, RSS, Docker, PWA

AI-powered news dashboard with RSS ingestion, keyboard shortcuts, and Groq-summarized articles.

DAMPos – Operating Systems, File Management, Memory Management, Process Management

Mini operating-system simulation covering core OS subsystems.

Certifications

Google Advanced Data Analytics Professional – Coursera, December 2024

ISO, CMMI & Project Quality Certification Mastery – Coursera, May 2026

IBM Systems Analyst – IBM / Coursera (in progress)

IBM Applied DevOps Engineering – IBM / Coursera (in progress)

Tech

Python, Go, JavaScript, Bash

React, FastAPI, Vite, Tailwind, Framer Motion

Git, Docker, Postman, GitHub Actions, Linux, Raspberry Pi

MongoDB, PostgreSQL, Redis, ClickHouse

REST, GraphQL, WebSockets, RSS, PWA
