Summary

Computer Engineer specializing in production serverless systems on AWS, Go microservices, and responsible agentic AI pipelines with automated CI/CD.

Technical Skills

- **Languages:** Go, Python, TypeScript, JavaScript, C++, SQL, Bash
- **Cloud & DevOps:** AWS (Lambda, DynamoDB, Bedrock, API Gateway, CloudFront, S3, Cognito), CDK, Docker, GitHub Actions, Linux
- **Web & Data:** React 19, Node.js, FastAPI, WebSockets, Deck.gl, MapLibre GL, Tailwind CSS, Vite
- **Security & Architecture:** Bedrock Guardrails, Socket SSRF Defense, HMAC Webhooks, Event-Driven IaC

Featured Projects

AreWeUpYet — Multi-Tenant Synthetic Uptime Monitoring SaaS <i>Go, AWS Amplify Gen 2, AWS CDK, Cognito, DynamoDB, React, TypeScript</i> • Built Go Lambda uptime probing engine with 1-minute EventBridge cron automation. • Engineered socket-dial SSRF defense blocking DNS rebinding and AWS IMDS (169.254.0.0/16). • Implemented HMAC-SHA256 signed webhooks and public status pages with 30s live polling.	Live Demo <i>GitHub</i>
Deony — Generative AI Media Experience Archive <i>React 19, TypeScript, AWS Bedrock, Bedrock Guardrails, Lambda ARM64, DynamoDB, AWS CDK</i> • Architected serverless archive with “Deonysus” Bedrock AI critic (Claude 3 Haiku / Nova). • Integrated Bedrock Guardrails for prompt-injection defense, live PII masking, and DynamoDB grounding. • Designed 4 DynamoDB tables with GSIs, Cognito JWT auth, and automated Playwright E2E tests.	Live Demo <i>GitHub</i>
DGOS — Digital Guest Ordering System <i>React, TypeScript, AWS Lambda, API Gateway WebSockets, DynamoDB, Cognito RBAC, AWS CDK</i> • Deployed 3-SPA restaurant ordering platform on AWS at ~\$0.80/month with 255+ unit tests. • Built real-time kitchen order updates via API Gateway WebSockets with auto-reconnect. • Defined full CDK IaC: 7 DynamoDB tables with PITR, S3 presigned uploads, and DLQ pipelines.	Live Demo <i>GitHub</i>
maylupa — Philippine Geospatial Infrastructure & Methodology-Cited AI <i>Python 3.12, AWS Lambda, Amazon Bedrock, Deck.gl, MapLibre GL, S3, CloudFront</i> • Mapped 1,613 Philippine municipalities at 60 FPS using Deck.gl WebGL and PSGC data pipeline. • Integrated Bedrock AI assistant citing official methodology documents at \$0.00/mo serverless cost.	Live Demo <i>GitHub</i>

Experience

Tech Support Intern <i>City Government of Trece Martires — ICT Division</i> • Normalized 13,000 citizen records across municipal databases, improving query retrieval speed. • Assisted rollout of Document Tracking System across municipal departments and conducted staff onboarding. • Resolved hardware, LAN network, and workstation tickets across government office endpoints.	Jul 2025 – Sep 2025 <i>Trece Martires City</i>
Part-Time Systems Support <i>NLMontano Accounting Firm</i> • Automated monthly SSS, PhilHealth, and Pag-IBIG remittance filings with zero audit discrepancies. • Maintained office LAN, workstation provisioning, and disaster recovery backup systems.	2021 – Present <i>Trece Martires City</i>

Education & Certifications

Cavite State University <i>Bachelor of Science in Computer Engineering</i>	2022 – Present <i>Cavite, Philippines</i>
• IBM DevOps, Cloud, and Agile Foundations Specialization – IBM	May 2026
• IBM Systems Analyst Professional Certificate – IBM	2026
• Google AI Professional Certificate – Google	April 2026
