Summary

Computer Engineering student with experience in full-stack software development, technical support, and systems troubleshooting. Skilled in Python, JavaScript, Go, React, FastAPI, Docker, Git, and REST APIs. Passionate about backend engineering, DevOps, and building reliable software systems.

Technical Skills

- **Languages:** Python, JavaScript, Go, C++, Bash
- **Tools:** Git, Docker, Postman, GitHub Actions, Linux

Experience

Tech Support Intern

City Government of Trece Martires – ICT Division

Jul 2025 – Sep 2025

Trece Martires City

- Verified and normalized large-scale citizen records, improving archive accuracy and consistency.
- Supported deployment of a Document Tracking System through validation, onboarding, and issue resolution.
- Troubleshot hardware, software, network, and workstation issues across multiple government departments.

Part-Time IT Support

NLMontano Accounting Firm

2021 – Present

Trece Martires City

- Processed SSS, PhilHealth, and Pag-IBIG remittances with high accuracy.
- Maintained office PCs, printers, and small office networks through setup and troubleshooting.
- Ensured reliable day-to-day IT operations in a small business environment.

Projects

VOTECHAIN

Python, React, Raspberry Pi, Blockchain, WebSockets

GitHub

- Developed a blockchain-based electronic voting system using Raspberry Pi and Python.
- Implemented SHA-256 hashing and immutable blockchain storage for tamper-evident vote records.
- Built a React dashboard with real-time vote monitoring using WebSockets.

Up To Date – AI-Powered News Dashboard

React, FastAPI, Docker, Groq API

GitHub

- Built a full-stack news dashboard using React and FastAPI.
- Integrated AI-powered article summarization using the Groq API.
- Implemented RSS aggregation, Progressive Web App support, and Docker deployment.

Education

Cavite State University

Bachelor of Science in Computer Engineering

2022 – Present

Certifications

- **AWS Cloud Solutions Architect** – Coursera June 2026
- **IBM DevOps, Cloud, and Agile Foundations** – Coursera May 2026
